

Report on the State of Ink Jet and Related Development for Textile and Fiber Printing

Patrice Giraud
Institut National De Grenoble (INPG) ESISAR
Cedex, France

Abstract

This report will survey current digital printing developments for textile and fiber printing. It will examine the various digital print solutions that have reached commercialisation and a number of those in development.

Biography

Patrice Giraud is a graduate of the Institut National Polytechnique de Grenoble (INPG) in Electronics and Information Transfer. He was one of the founding members of Imaje and has over twenty years experience in the development of digital printing solutions. He directed the operations of Embleme that developed both continuous and piezoelectric ink jet methods for printing textiles and other applications. He continues to consult and develop digital printing solutions in addition to his teaching activities.
